FUTURE FOCUS 2019 AND BEYOND

- ❖ Strengthening the implementation of Cambodia Metrology Law and legal regulations for trade in Metrological fields
- ❖ Increasing and strengthening the capacity of technical officials
- ❖ Developing the working standards
- ❖ Encouraging the cooperation and advocating the existing project
- ❖ Continuing to integrate Cambodia's legal metrology to ASEAN and the world

Verification:

Continue to advocate the verification of instruments, road tankers, weighbridges, fuel dispensers, pre-packaged products and analog scales
Encourage to implement the legal regulations of Electronic and Water Meters
Create more legal norms to control other metrological instruments

Official's Capacity:

- Continue to send technical officials for training in both ASEAN and International countries
- Increase local training to strengthen provincial officials' capacity building
- Research, collect and translate all foreign documents to compile foundation of technical lesson

Environment and Trade Protection:

- Publish all issues involved with citizen's ignorance on metrology
- Strictly punish offenses affecting free and fair trade

Integration and Harmonization:

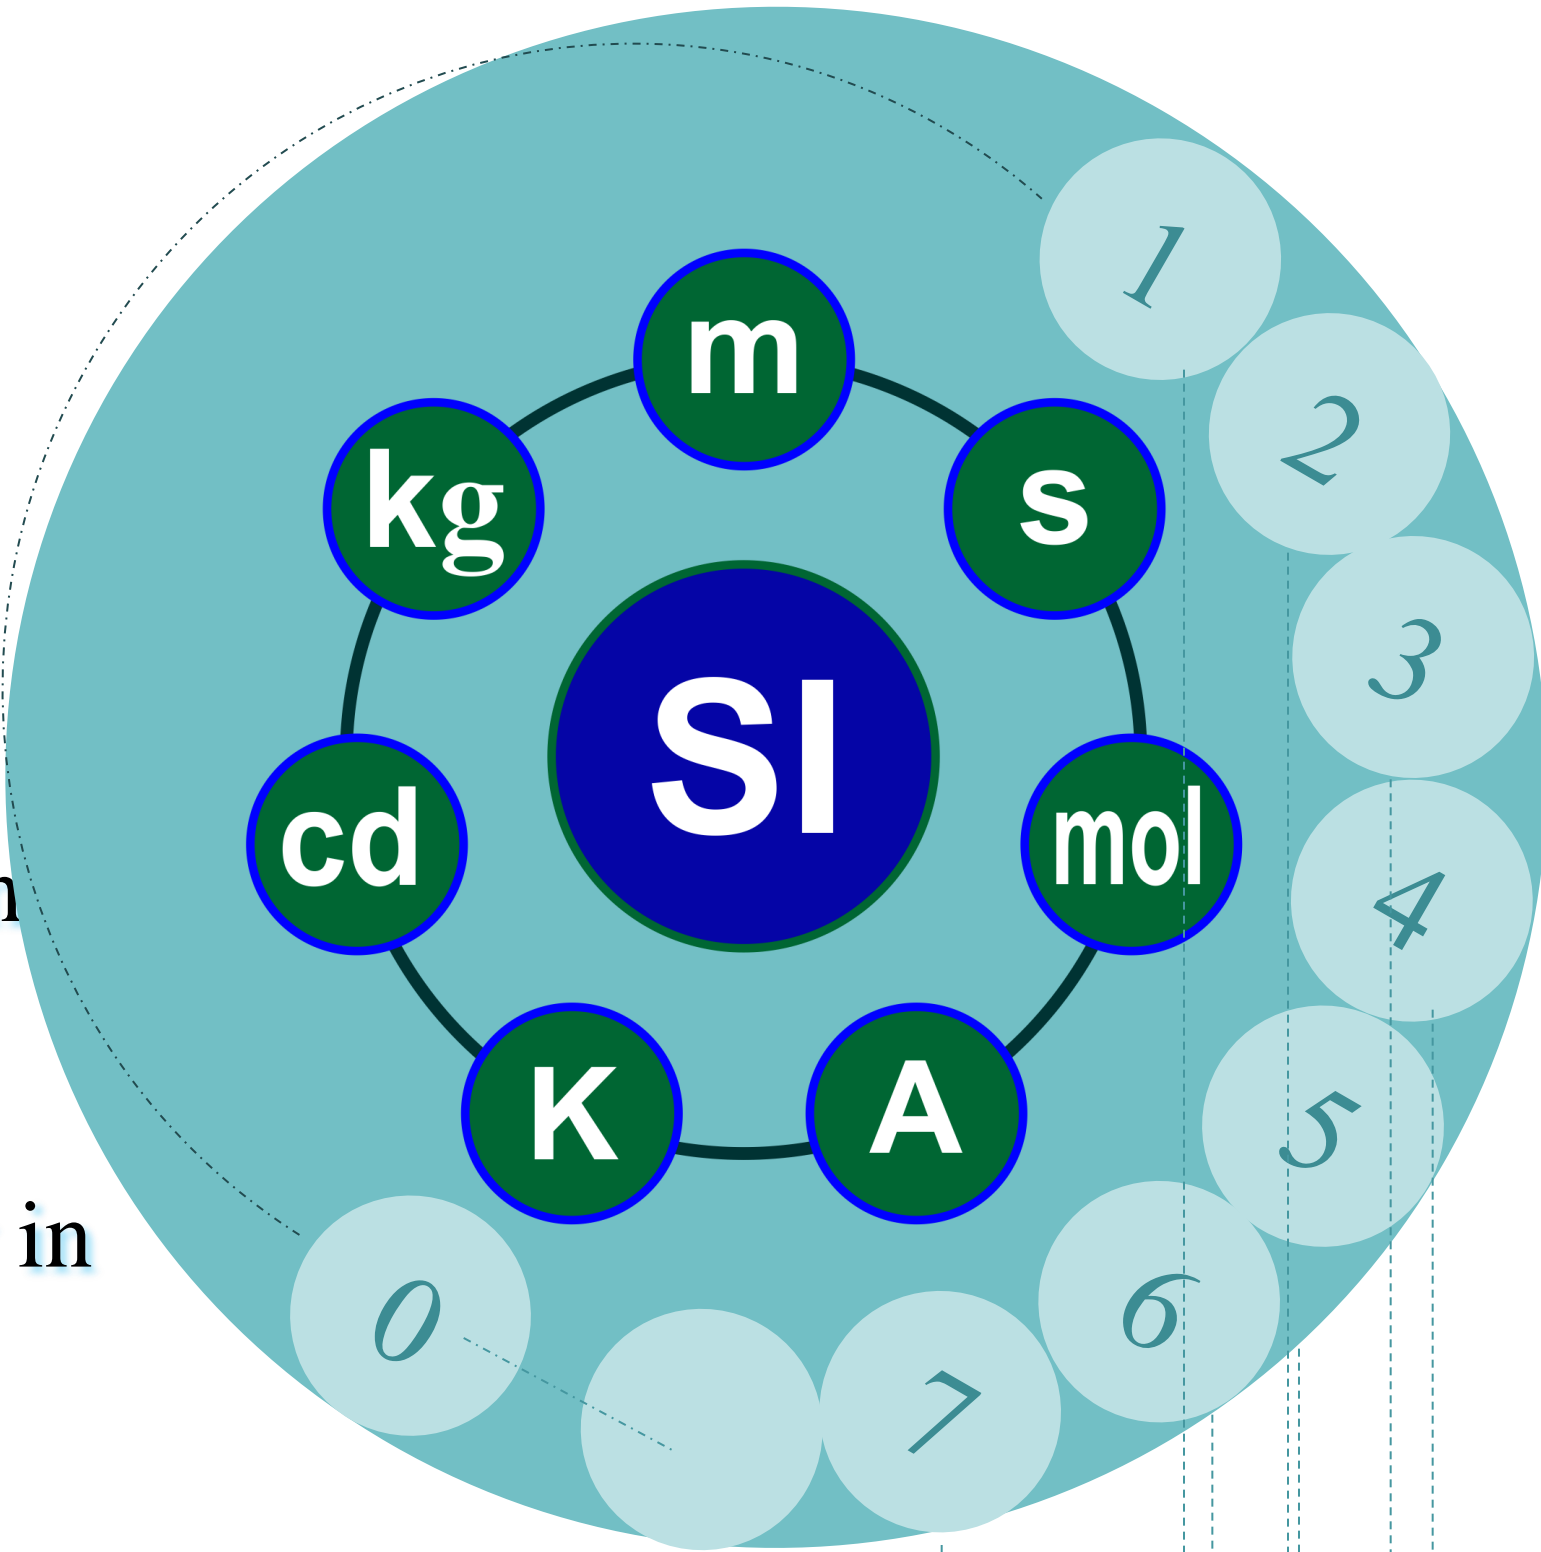

- Encourage to integrate all legal regulation and norms harmoniously in ASEAN and international verification fields
- Create network in the field of technology in order to solve any technical problems

Cooperation and Project:

- Continue to advocate the existing projects to achieve the plan in legal metrology and participate meeting and workshop
- Look for partners from local and international private sector to participate in the free market
- Encourage the existing efficiency and establish new cooperation

Working Standards:

- Maintain all existing standards to promote the stability of quality
- Find more standards to facilitate technical verification of owner's instruments
- Encourage to educate the existing standards to make in services.

Commitment
