

# [Republic of Korea] - Economy Report Highlights

## Key Activities - 2016 / 2017

### Foundation of Korea Smart Metering Forum (KSMF)

- Objective: To provide cooperation basis through involvement of the industry, manufacturer, and consumer
- Operation: Exchanging information on smart metering, technical requirements and international trends in the field of metrology, including AMI, Big Data, Cloud, etc.

### Control System of Imported Measuring Instruments

## Future Focus - 2018 & beyond

### Charger for Eco-friendly vehicles

- EV supply equipment will be regulated from 2018.
- KATS will consider hydrogen charger as legal metrology instrument, participating in the revision work of OIML R139.

### NAWI monitoring system using mobile application

- Develop QR code application for inspectors to monitor NAWI information conveniently
- Conduct pilot project at the market to verify its effectiveness
- Add GPS tracking function to allow inspectors to locate the NAWI
- Operate online open forum to share information
